

# Angular Academy Enterprise Security

All your team needs to know about **Web Security** and the implementation of role-based enterprise-grade authorization in **Angular** and **Node.js**

10-weeks learning program that will make your team confident about security in your Angular applications (and any API)!

By the end of this program, your team will:

- ✓ have a solid understanding of Web Security model
- ✓ know Web Security vulnerabilities and prevention methods
- ✓ implement role-based authorization system in a real-life application
- ✓ know how to secure Angular application and backend API

Bartosz brings in-depth knowledge and experience in Angular enterprise development. He gives tremendous value to the Angular community.

*Brad Green, Engineering Director for Angular in Google*

## Your teacher

Bartosz Pietrucha

Angular Academy founder,  
software consultant, trainer,  
international speaker
